Specific Instructions For Taxpayers with Income from Sources Within and Without the State

Multistate corporations should complete lines 32-47 of page 1, and Schedule A, page 2 of Form AR1100CT. Multistate corporations should not complete lines 9-31 of Form AR1100CT. If all apportionment factors are 100%, the corporation is not multistate and should file as a corporation operating only in Arkansas.

In general, taxpayers with income derived from activities both within and without the State are required to allocate and apportion the net income under the following provision.

Business and Nonbusiness Income Defined-ACA 26-51-701(a) defined "Business Income" as income arising from transactions and activity in the regular course of the taxpayer's trade or business and includes income from tangible and intangible property if the acquisition, management and disposition of the property constitute integral parts of the taxpayer's trade or business operations. In essence, all income which arises from the conduct of trade or business operations of a taxpayer is business income. Income of any type or class and from any source is business income if it arises from transactions and activity occurring in the regular course of a trade or business. In general, all transactions and activities of the taxpayer's trade or business and will be considered "Business Income", unless otherwise excluded by Arkansas law. Nonbusiness income and the taxpayer and the taxpayer is and will be considered "Business income means all income other than business income.

Unitary Determination of Intangible Income:

Interest, dividends (less than 80% directly owned), rents, royalties and gains and losses from multistate corporations are apportionable to Arkansas if a unitary business relationship exists between the intangible income and the State of Arkansas. The U.S. Supreme Court has identified certain factors of profitability such as functional integration, centralization of management and economies of scale and summarized these factors in the use of the term "flow of value" to indicate the contribution made to the overall business enterprise. Generally, a unitary business relationship will exist when an activity conducted in one state benefits and is benefited by an activity conducted in another state.

Arkansas will not accept returns filed on a unitary combined report basis.

Apportionment Formula:

For tax years beginning on or after January 1,1995 (for all multistate corporations except financial institutions, airlines, bus lines, truckers and private railcar operators) business income is to be apportioned to this State by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor, plus double the sales factor, and the denominator of which is four (4). If a taxpayer does not have all four (4) factors, the denominator shall be the same as the number of entries other than zero (0) that apply to the total (everywhere) amounts of the property, payroll and sales factors. When double weighted, the sales factor counts as two (2). For tax years beginning prior to January 1,1995, the single weighted sales factor must be used. Construction companies, pipelines, publishing companies, railroads, and TV and radio broadcasters must utilize the double weighted sales factor apportionment method with factor modifications. Requirements for apportionment formulas of the businesses listed in this paragraph (except for financial institutions) are contained in the Arkansas Corporation Income Tax Regulations which may be obtained from:

> Department of Finance and Administration Corporation Income Tax Section P O Box 919 Little Rock, AR 72203-0919

or download from www.dfa.Arkansas.gov/

Property Factor:

The property factor is a fraction, the numerator of which is the average value of the taxpayer's real and tangible personal property owned or rented and used in this state during the tax period and the denominator of which is the average value of all the taxpayer's real and tangible personal property owned or rented and used during the tax period. The average value of property owned by the taxpayer means the average of the original cost of the property including inventories, at the beginning and ending of the tax period. Property rented by the taxpayer is valued at eight (8) times the net annual rental rate.

Payroll Factor:

The payroll factor is a fraction, the numerator of which is the total amount paid in this State during the tax period by the taxpayer for compensation, and the denominator of which is the total compensation paid everywhere during the tax period.

Compensation is paid in this State if:

- (A) The individual's service is performed entirely within the State, **or**
- (B) The individual's service is performed both within and without the State, but the service performed without the State is incidental to the individual's service within the state, or
- (C) Some of the service is performed in the State, and
 - The base of operations or, if there is no base of operations, the place from which the service is directed or controlled, is in the State, or
 - (2) The base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed, but the individual's residence is in this State.

Sales Factor:

The sales factor is a fraction, the numerator of which is the gross sales of the taxpayer in this State during the tax period, and the denominator of which is the gross sales of the taxpayer everywhere during the tax period.

Sales of tangible personal property are in this State if:

- (A) The property is delivered or shipped to a purchaser, other than the United States Government, within this State regardless of the f.o.b. point or other conditions of the sale, or
- (B) The property is shipped from an office, store, warehouse, factory, or other place of storage in this State, **and**
 - (1) the purchaser is the United States Government, or
 - (2) the taxpayer is not taxable in the state of the purchaser.

Sales, other than sales of tangible personal property, are in this State if:

- (A) The income producing activity is performed in this State, or
- (B) The income producing activity is performed both within and without the State in which event the income allocable to this State shall be the percentage that is used in the formula for apportioning business income to this State.

Part B, Line 3.g. of Schedule A (Page 2 of AR1100CT) reflects the double weighting of the sales factor.

Allocated Income:

Partnership Income:

ACA 4-32-1313 and ACA 26-51-802 are amended by Act 965 of 2003 to adopt the federal "check the box" rules to make it consistent with Federal law regarding the income taxation of Limited Liability Companies and Partnerships. The change is effective for tax years beginning on or after January 1, 2003.

Subject to the provisions of ACA 26-51-202(e), all partnership income from activities within this State that is reflected on a partnership return shall be allocated to this State. Submit appropriate schedule [ACA 26-51-802(b)].

Non-business Income:

The following items of income to the extent that they do not constitute business income are to be allocated to this State.

1. Rents & Royalties:

- A) Net rents and royalties from real property located in this State.
- B) Net rents and royalties from tangible personal property.
 - 1) If and to the extent that the property is used in this State, or
 - 2) In their entirety, if the commercial domicile is in this State and the taxpayer is not organized under the laws of or taxable in the state in which the property is utilized.

The extent of utilization of tangible personal property in a state is determined by multiplying the rents and royalties by a fraction, the numerator of which is the number of days of physical location of the property in the State during the rental or royalty period in the taxable year; and the denominator of which is the number of days of physical location of the property everywhere during all rental or royalty periods in the taxable year.

If the physical location of the property during the rental or royalty period is unknown or unascertainable by the taxpayer, tangible personal property is utilized in the state in which the property is located at the time the rental or royalty payer obtained possession.

2. Gains and Losses:

Gains and losses from sales of assets:

- A) Sales of real property located in this State.
- B) Sales of tangible personal property.
 - 1) The property had a situs in this State at the time of sale, or
 - 2) The taxpayer's commercial domicile is in this State, or
 - 3) The property has been included in depreciation which has been allocated to this State; in which event gains or losses on such sales shall be allocated on the percentage that is used in the formula for allocating income to this State.

3. Interest and Dividends:

Interest and dividends if the taxpayer's commercial domicile is in this State.

4. Patent and Copyright Royalties:

- A) If and to the extent that the patent or copyright is utilized by the taxpayer in this State, **or**
- B) If and to the extent that the patent or copyright is utilized by the taxpayer in a state in which the taxpayer is not taxable and the taxpayer's commercial domicile is in this State.

A copyright is utilized in a state to the extent that printing or other publications originate in the state. If the basis of receipts from copyright royalties does not permit allocation to states or if the accounting procedures do not reflect states of utilization, the copyright is utilized in the state in which the taxpayer's commercial domicile is located.

Change of Method:

<u>Prior Approval Required Before Deviation From the Allocation and</u> <u>Apportionment Method:</u> If the allocation and apportionment provisions as set out above do not fairly represent the extent of the taxpayer's business activity in this State, the taxpayer may petition for, or the Commissioner of Revenue, Department of Finance and Administration may require, in respect to all or any part of the taxpayer's business activity, if reasonable:

- A) Separate accounting;
- B) The exclusion of any one or more factors;
- C) The inclusion of one or more additional factors which will fairly represent the taxpayer's business activity in this State, **or**
- D) The employment of any other method to effectuate an equitable allocation and apportionment of the taxpayer's income.

<u>To "petition for" shall mean a formal written request submitted and approved prior to the filing of a return.</u>

Apportionment of Intragroup Intangible Licensing Transactions:

Regulation 1996-3 clarifies the calculation method for determining the sales factor in apportioning business income received from intragroup intangible licensing transactions. This regulation applies to a corporation that is a passive intangible holding company and receives business income from intragroup intangible licensing transactions with one or more members of the same group. Also, at least one of the other members of the same group from which the business income is received by the taxpayer must be subject to the Arkansas Income Tax Act.

The sales factor for intragroup intangible licensing transactions is modified as follows:

- If the licensing agreement states a method of measuring the activity between the licensor and licensee, the numerator of the sales factor is the amount of the sales or receipts received as provided in the licensing agreement.
- 2. If the licensing agreement does not state a method of measuring the activity between the licensor and licensee, the measuring activity will be based on one of the following:

- a. If the licensee's activity generates sales or receipts, the numerator of the sales factor will be the percentage of sales in Arkansas compared to the licensee's total sales, or
- b. If the licensee's activity does not generate sales or receipts, the numerator of the sales factor will be the percentage of units produced or cost of units produced in Arkansas compared to the licensee's total units produced or total cost of units produced, or
- c. If neither of the above methods accurately represent the licensor's business activity in Arkansas, the licensor may petition for or the Director may require another method.
- 3. If the licensing agreement states a method of measuring the activity between the licensor and licensee in addition to a specifically stated dollar amount, the numerator of the sales factor will be the stated measuring activity plus the stated dollar amount attributable to Arkansas.

This Regulation modifies the sales factor for intragroup intangible licensing transactions only, and business income from any other source should be apportioned in accordance with ACA 26-51-709.

If a passive intangible holding company meets the above characteristics and the licensee elects to forego the intragoup intangible licensing transactions deduction, the passive intangible holding company will not be required to report the business income received from intragroup intangible licensing transactions for Arkansas income tax purposes.

The licensee's election to forego the deduction will be binding unless the licensee and the passive intangible holding company submit a written petition to change the election to the Director, and the Director approves the change.

FINANCIAL INSTITUTIONS

In general all state and national banks, savings and loan, building and loan associations or any other entity operating as financial institutions are to be taxed under existing law. For a complete definition of "financial institution" refer to ACA 26-51-1402.

Who must file:

- A financial institution having its principal office in this State shall be taxed as a business corporation organized and existing under the laws of this State, or
- A financial institution having its principal office outside this State but doing business in this State shall be taxed as a foreign business corporation doing business in this State.

This is not intended to recognize the right of a foreign financial institution to conduct any business in this State except to the extent and under the conditions permitted by any acts or any other now existing applicable laws of this State.

ACA 26-51-702 requires financial organizations having business income from business activity both within and without the State of Arkansas to apportion their net income.

ACA 26-51-426 adopted Internal Revenue Code Sections 582, 585, and 593 as if effect January 1, 1999 regarding bad debts of financial institutions.

ACA 26-51-1401 et seq. (effective for taxable years beginning on or after January 1, 1996) adopted the Multistate Tax Commission regulation regarding apportionment and allocation of net income of financial institutions. It requires that a financial institution whose business activity is taxable both within and without this State to allocate and apportion its net income to this State. All business income which is includable in the apportionable income tax base, shall be apportioned to this State by multiplying such income by the apportionment percentage. The apportionment percentage is determined by adding the receipts factor, property factor, and payroll factor and dividing the sum by three (3).

Receipts Factor:

Generally, the receipts factor is a fraction, the numerator of which is the receipts of the taxpayer in this State during the taxable year and the denominator of which is the receipts of the taxpayer within and without this State during the taxable year. The method of calculating receipts for purposes of the denominator is the same as the method used in determining receipts for purposes of the numerator. The receipts factor shall include only those receipts described herein which constitute the business income and are included in the computation of the apportionable income base for the taxable year. Financial institutions cannot double weight the receipts factor. (Refer to ACA 26-51-1403).

Property Factor:

Generally, the property factor is a fraction, the numerator of which is the average value of real property and tangible personal property rented to the taxpayer that is located or used within this State during the taxable year, the average value of the taxpayer's real and tangible personal property owned that is located or used within this State during the taxable year, and the average value of the taxpayer's loans and credit card receivables that are located within this State during the taxable year, and the denominator of which is the average value of all such property located or used within and without this State during the taxable year. (Refer to ACA 26-51-1404).

Payroll Factor:

Generally, the payroll factor is a fraction, the numerator of which is the total amount paid in this State during the taxable year by the taxpayer for compensation and the denominator of which is the total compensation paid both within and without the State during the taxable year. The payroll factor shall include only that compensation which is included in the computation of the apportionable income tax base for the taxable year. (Refer to ACA 26-51-1405).

Small Business (S) Corporations

Qualifying corporations may elect to be treated as "Small Business (S) corporations" for Arkansas income tax purposes. Act 261 of 2005 requires corporations to have elected Subchapter S treatment for federal tax purposes if electing Subchapter S treatment for Arkansas income tax purposes for the same tax year. The election may be made only if the corporation meets all of the following requirements:

- 1) It is treated as a Small Business Corporation with the Internal Revenue Service (IRS).
- 2) It has no more than 100 shareholders. Members of a family (and their estates) are treated as one shareholder for this requirement. All other persons are treated as separate shareholders.
- It must be a corporation organized or created under the laws of the United States or a state or territory or it is a similar association taxed as a corporation.
- 4) Its shareholders are individuals, estates and certain trusts described in IRC 1361.
- 5) It has no nonresident alien shareholders.
- 6) It has only one class of stock.
- 7) It is not an ineligible corporation as defined in IRC 1361.
- 8) Banks may elect S Corp status even though the bank stock is owned by an individual's IRA rather than the individual.

For an election to be valid, all persons who are shareholders of the corporation on the first day of the corporation's taxable year or on the day of the Arkansas election, whichever is later, must consent by signature, to such election on Arkansas election Form AR1103 and requires a copy of the IRS Notice of Acceptance as an S Corporation to be submitted for approval. If the AR1103 is received without the Notice, it will not be approved until the Notice is received. All shareholders are required to file Arkansas Individual income tax returns or be included in a composite return. Please refer to the 2010 Subchapter S tax booklet for details on filing as an S corporation.

The annual income tax return of a small business corporation is to be submitted on Arkansas Form AR1100S. The Arkansas election (Form AR1103) and Arkansas Subchapter S corporation income tax return (Form AR1100S) should be submitted to:
